# Snowballing method to eliminate debt using a monthly surplus of 

 \$3,000(Calculate your monthly surplus amount from our Cash Management worksheet)

| Item | Interest Rate | Balance | Minimum Repayment |
| :---: | :---: | :---: | :---: |
| GE Loan | 24\% | \$3,000 | \$812 <br> (This amount is your monthly surplus amount less the total of minimum repayments) |
| Visa Card | 21\% | \$6,000 | \$240 <br> (Once GE Loan is paid off, increase repayments here by $\$ 812$ to \$1,052) |
| Car Loan | 11\% | \$12,000 | \$480 <br> (Once Visa Card is paid off, increase repayments here by $\$ 1,052$ to $\$ 1,532$ ) |
| Mortgage | 8\% | 200,000 | \$1,468 <br> (Once Car Loan is paid off, increase repayments here to $\$ 3,000$ and pay your house off quicker!) |

Remember - chop up your credit cards before starting this process!

The snowballing method;

- Eliminating one debt at a time, start repaying the lowest balance and the highest interest paying debt first
- Each time you fully repay off a balance, increase the repayments of your next item of debt. In the above example, add \$1,080 + \$240 = $\$ 1,320$ so the Visa Card repayments will now be $\$ 1,320$ and so on until you're debt free!
